

SAVING AN EXISTING WORD PROCESSING DOCUMENT IN PDF FORMAT

- ◆ Open the document you wish to save as in pdf. Select the Printer icon on the tool bar, or go to File> Print.
- ◆ Select Current Printer and change the default printer on the drop-down menu to **Acrobat PDF Writer** and then Print.
- ◆ At the ***Save PDF File As*** screen browse to the folder you want your pdf to reside on your C drive and then name your pdf in the ***File name:*** field and Save. REMEMBER to leave the extension as **.pdf**

TO ATTACH A PDF TO AN ENTRY IN CM/ECF

- ◆ If you have a pdf file to attach to an entry in CM, when prompted to do so simply Browse to your C drive where you saved it. Change the Files of type to All Files[*.*]
- ◆ Select the appropriate pdf file to be attached to your entry, and “right click” and open to verify that it is the correct image (**IT IS VERY IMPORTANT TO ALWAYS OPEN THE PDF AND VERIFY IT FOR ACCURACY**). If it is the correct pdf, close out and Open – you have now placed that pdf in CM/ECF to continue docketing. (If you realize that you have attached the incorrect pdf prior to completing your entry, simply use the Back button and reattach the correct PDF.)
